

## HANDICAP WHEN PLAYING AGAINST THE COURSE

Per the USGA, when a Team plays 2 Ball Best Ball Net against the course, each player's handicap will be reduced to 90% of their handicap.

Therefore, if your team is playing the course, use the following format:

- 1) select who's playing with whom ahead of time.
- 2) Somebody from the team **MUST** stop in the pro shop **BEFORE** heading out and let the pro shop know who is with who.
  - a) That way the team can't just change their minds mid-round of who is playing with who in order to benefit their 2-ball scores.
  - b) For example, if A plays with B and both are playing badly, they can't just switch and say A was with C, B was with D.
- 2) Use the following chart to determine handicaps
